SCHNEID surge arrester FSS-SCHNEID 422-WIRE

with loose wire ends for connection to bus terminals

Order number: 020.09129

Order code: Überspannungsableiter 422-WIRE

Overview:

The SCHNEID 422-WIRE surge arrester is clamped to the communication circuit board together with the data cable. With proper wiring and connection in accordance with the SCHNEID connection regulations (more information at www.schneid.at), the 422-WIRE arrester protects the data interface of the controller against overvoltages as a result of indirect lightning strikes. The surge arrester is supplied with loose wire ends and is used when no SCHNEID data socket is available.

Please observe the connection regulations for SCHNEID data networks.
